

MBS200-XX

FIRE KEYSWITCH OPTION

SYSTEM

FIRE KEYSWITCH OPTION

The MBS200 is designed to accommodate 1-2 cars, in a single bank. A 9 inch Industrial TFT screen provides a sleek and modern single point visual status of all cars. The screen can show on screen message jewels such as: Fire Phase 1 & 2, Emergency Power, Car to Lobby, and Out of Service indications, amongst others. There is an option to add a Fireman's Jack. Keyswitch interface is through the MBS system, as opposed to being hard wired into a machine room. Typical industry standard lobby panels require multi-conductor wire pulls for each car, while the MBS Lobby Panel Series only requires a single 3-TWSP (actually requires 2-TWSP & 1 common) cable for the entire group.

TYPICAL APPLICATIONS:

- > FCC/CACF elevator control lobby panel
- > Elevator status panel
- > Remote security monitoring

FEATURES:

- > Lower total system install cost
- > Single 3-TWSP from MR to lobby panel
- > Pre-wired key switches
- > 4 Standard Number of Car Messages, Maximum of 8 depending on screen size, 4 for group messages
- > Building Network Option Availability
- > Reduced lead time-Standard Stock Panel
- > 0-70°C operating temperature
